

# Package ‘NCIgraph’

January 23, 2026

**Title** Pathways from the NCI Pathways Database

**Version** 1.58.0

**Date** 2012-04-27

**Author** Laurent Jacob

**Maintainer** Laurent Jacob <laurent.jacob@gmail.com>

**Description** Provides various methods to load the pathways from the NCI Pathways Database in R graph objects and to re-format them.

**License** GPL-3

**LazyLoad** yes

**Imports** graph, KEGGgraph, methods, RBGL, RCy3, R.oo

**Depends** R (>= 4.0.0)

**Suggests** Rgraphviz

**Enhances** DEGraph

**biocViews** Pathways, GraphAndNetwork

**git\_url** <https://git.bioconductor.org/packages/NCIgraph>

**git\_branch** RELEASE\_3\_22

**git\_last\_commit** eb4dd86

**git\_last\_commit\_date** 2025-10-29

**Repository** Bioconductor 3.22

**Date/Publication** 2026-01-22

directedBFS	<i>Uses a breadth first search on a directed graph to identify which genes are regulated by a particular node in the graph</i>
-------------	--

---

**Description**

Uses a breadth first search on a directed graph to identify which genes are regulated by a particular node in the graph.

**Usage**

```
directedBFS(g, node)
```

**Arguments**

g	A <a href="#">graph</a> object.
node	A node of g.

**Value**

A structured [list](#) containing the regulated genes and the type of interaction between node and each gene.

**Author(s)**

Laurent Jacob

**See Also**

[propagateRegulation\(\)](#)

---

edgesToMerge	<i>Identifies edges that should be merged to parse a NCI network</i>
--------------	--

---

**Description**

Identifies edges that should be merged to parse a NCI network.

**Usage**

```
edgesToMerge(g)
```

**Arguments**

g	A <a href="#">graph</a> object.
---	---------------------------------

**Value**

A [list](#) of edges to be merged

**Author(s)**

Laurent Jacob

**See Also**[parseNCInetwork\(\)](#)

---

getNCIPathways

---

*Loads networks from Cytoscape and parses them*

---

**Description**

Loads networks from Cytoscape and parses them.

**Usage**

```
getNCIPathways(cyList=NULL, parseNetworks=TRUE, entrezOnly=TRUE, verbose=FALSE)
```

**Arguments**

cyList	a <a href="#">list</a> providing the networks loaded from Cytoscape. If <a href="#">NULL</a> , the function will try to build the <a href="#">list</a> from Cytoscape.
verbose	If <a href="#">TRUE</a> , extra information is output.
parseNetworks	A <a href="#">logical</a> . If <a href="#">FALSE</a> , the raw NCI networks are returned as graphNEL objects. If <a href="#">TRUE</a> , some additional parsing is performed by the parseNCInetwork function.
entrezOnly	A <a href="#">logical</a> . If <a href="#">TRUE</a> , only keep nodes with an entrezID property.

**Value**

A [list](#) of two elements: pList, a [list](#) of graphNEL objects, and failedW a [list](#) containing the names of the networks that R failed to read from cytoscape.

**Author(s)**

Laurent Jacob

**See Also**[parseNCInetwork\(\)](#)**Examples**

```
##-----
## Load NCigraph
##-----

library(NCigraph)

##-----
## Example 1: with Cytoscape
##-----
```

```
## Must have Cytoscape running with some networks open and CyREST plugin started.

## In this case, getNCIPathways will both read the raw networks from Cytoscape and parse them.

## Not run:
grList <- getNCIPathways(cyList=NULL, parseNetworks=TRUE, entrezOnly=TRUE, verbose=TRUE)$pList

## End(Not run)

##-----
## Example 2: without Cytoscape
##-----

## Get some raw networks

data("NCIgraphVignette", package="NCIgraph")

## When passed a non null cyList argument (a list of networks),
## getNCIPathways will simply parse the list of networks

grList <- getNCIPathways(cyList=NCI.demo.cyList, parseNetworks=TRUE, entrezOnly=TRUE, verbose=TRUE)$pList
```

---

getSubtype.NCIgraph	<i>Returns a list of @KEGGEdgeSubType objects describing each edge of the NCI network</i>
---------------------	---

---

## Description

Returns a list of @KEGGEdgeSubType objects describing each edge of the NCI network.

## Usage

```
getSubtype.NCIgraph(object)
```

## Arguments

object            An [NCIgraph](#) object.

## Value

A [list](#) of KEGGEdgeSubType objects.

## Author(s)

Laurent Jacob

## Examples

```
##-----
## Load NCIgraph
##-----

library(NCIgraph)
```

```
##-----  
## Get some raw networks  
##-----  
  
data("NCIgraphVignette", package="NCIgraph")  
  
##-----  
## Parse them  
##-----  
  
grList <- getNCIPathways(cyList=NCI.demo.cyList, parseNetworks=TRUE, entrezOnly=TRUE, verbose=TRUE)$pList  
  
##-----  
##  
## Get the subtype of the second network. Some activation and some  
## inhibition edges.  
##  
##-----  
  
getSubtype.NCIgraph(grList[[2]])
```

---

is.NCIgraph

*Assess whether a graph is a NCI graph*

---

## Description

Assess whether a graph is a NCI graph.

## Usage

```
is.NCIgraph(gr)
```

## Arguments

`gr` A [graph](#) object.

## Value

A [logical](#), [TRUE](#) if the graph is a NCI graph, [FALSE](#) otherwise.

## Author(s)

Laurent Jacob

## See Also

[parseNCInetwork\(\)](#)

---

mergeNodes	<i>Merges a given list of nodes in a graph</i>
------------	--

---

**Description**

Merges a given list of nodes in a graph.

**Usage**

```
mergeNodes(g, mEdges, separateEntrez=TRUE, entrezOnly=TRUE)
```

**Arguments**

g	A <a href="#">graph</a> object.
mEdges	A <a href="#">list</a> of nodes to be merged.
separateEntrez	A <a href="#">logical</a> . If <a href="#">TRUE</a> , don't merge two nodes with entrezID.
entrezOnly	A <a href="#">logical</a> . If <a href="#">TRUE</a> , only keep nodes with an entrezID property.

**Value**

The updated [graph](#) object

**Author(s)**

Laurent Jacob

**See Also**

[parseNCInetwork\(\)](#)

---

NCI.demo.cyList	<i>10 raw NCI networks from Nature curated pathways and BioCarta imported as graphNEL objects, for demonstration purpose</i>
-----------------	--

---

**Description**

These are the ten first elements of the full list of raw networks that can be downloaded using the downloadCyLists.R script.

**Usage**

```
NCI.demo.cyList
```

**Format**

A list of 10 graphNEL objects.

**Author(s)**

Laurent Jacob

Examples

```
data("NCIgraphVignette")
length(NCI.demo.cyList)

library(Rgraphviz)
plot(NCI.demo.cyList[[1]])
```

---

NCIgraph	<i>Class NCIgraph</i>
----------	-----------------------

---

Description

Package: NCIgraph  
**Class NCIgraph**

public static class **NCIgraph**  
extends graphNELObject

Class extending graphNEL fro graphs build from NCI gene networks.

Author(s)

Laurent Jacob

---

parseNCInetwork	<i>Takes a NCI network and transforms it into a simpler graph only representing inhibition/activation relationships between genes</i>
-----------------	---

---

Description

Takes a NCI network and transforms it into a simpler graph only representing inhibition/activation relationships between genes.

Usage

```
parseNCInetwork(g, propagateReg=TRUE, separateEntrez=TRUE, mergeEntrezCopies=TRUE, entrezOnly=TRUE)
```

Arguments

- g                   A [graph](#) object.
- propagateReg       A [logical](#). If [TRUE](#), use propagateRegulation to transform the network before parsing it.
- separateEntrez     A [logical](#). If [TRUE](#), don't merge two nodes with entrezID.
- mergeEntrezCopies       A [logical](#). If [TRUE](#), merge resulting nodes that have the same entrezID.
- entrezOnly          A [logical](#). If [TRUE](#), only keep nodes with an entrezID property.

**Value**

The new [graph](#) object.

**Author(s)**

Laurent Jacob

**Examples**

```
## Load NCIGraph

library(NCIGraph)

## Get some raw networks

data("NCIGraphVignette", package="NCIGraph")

## Parse the first of them

parsedNetwork <- parseNCInetwork(NCI.demo.cyList[[1]],propagateReg=TRUE,separateEntrez=TRUE,mergeEntrezCopl
```

---

propagateRegulation	<i>Transforms the network in a way that each Biochemical Reaction node pointing to a Complex points to what is regulated by the complex and updates the interaction types accordingly</i>
---------------------	---

---

**Description**

Transforms the network in a way that each Biochemical Reaction node pointing to a Complex points to what is regulated by the complex and updates the interaction types accordingly.

**Usage**

```
propagateRegulation(g)
```

**Arguments**

**g**                      A [graph](#) object.

**Value**

The updated [graph](#) object

**Author(s)**

Laurent Jacob

**See Also**

[parseNCInetwork\(\)](#)

---

translateNCI2GeneID	<i>Gives the entrezID corresponding to the nodes of a graph</i>
---------------------	---

---

**Description**

Gives the entrezID corresponding to the nodes of a graph.

**Usage**

```
translateNCI2GeneID(g)
```

**Arguments**

g                      A [graph](#) object.

**Value**

A vector of [character](#) giving the entrez ID of the nodes of g.

**Author(s)**

Laurent Jacob

**See Also**

[parseNCInetwork\(\)](#)

**Examples**

```
##-----  
## Load NCIGraph  
##-----  
  
library(NCIGraph)  
  
## Get some raw networks  
  
data("NCIGraphVignette", package="NCIGraph")  
  
## Parse them  
  
grList <- getNCIPathways(cyList=NCI.demo.cyList, parseNetworks=TRUE, entrezOnly=TRUE, verbose=TRUE)$pList  
  
## Get the gene ids for the first of them  
  
gids <- translateNCI2GeneID(grList[[1]])
```
